I enjoyed this class. This is an online course which students choose to continue their education while having the flexibility than a classroom instructed class. The instructor has provided this flexibility by providing setting the expectations and timeline at the beginning of the course. The instructor was very clear and prompt with posting the grades to allow the students to keep up with their progress. Also, the instructor provided opportunity to improve with extra credit work. I would recommend this class to other students.
Very organized. Clearly stated goals. Helpful reminders.
I loved this class. With online courses I like the way that you can work ahead when you have a free weekend and get the next couple of weeks done when you may be busy with work during the week.

Sends reminders. Had the entire semester of assignments laid out and we could work at our own leisure.
we have enough time to finish assignments.
I liked that the assignments are posted at the beginning of the class and students can work at their own pace, but still have due dates. I also liked how the grading system is explained so there' no quessing what the grade is.
Felt comfortable about asking questions. The introduction part he made helped it feel more comfortable. Glad he sent e-mails reminding the deadlines for tests and quizzes.
This was my first online ccourse and he was able and did answer any all my question
The instructor was clear and concise in all instructions and objectives of the course. He sincerely cared about each student's progress in the class.
I took the online class! I particularly liked the fact that the test and quiz questions were relavant to key processes or features of the system. He seemed to be testing us on things that needed to stick out in our memory to help navigate through learning and using the system. That was a great help!
I also appreciated the grouping of assignments versus having assignments due each week! People who usually take on-line classes do so because of a busy other life schedule! I appreciated not feeling rushed. Thank you.
This professor is great!! He made his self available for problems and answered all emails within 24 hours.
Provided the information that was needed, open communication and the reassurance that the task at hand could be accomplish with a favorable outcome by staying on top of the lesson plan.
I appeciate how the class was structured and that I was able to complete the course requirements at my own pace, rather than just having weekly assignments. I would also like to thank you for not making us post random comments on the discussion board.

None .... I liked the course just fine.
No changes, he did a great job with the blackboard site and teaching.

No changes
None.
None that I can see
nothing
I think reports for the completed chapters should be required as part of the grade. I think since this is computerized accounting, in addition to end of chapter tests, complete and correct reports would be a helpful indicator that that students understand the software and the accounting principles.
Make it clear about the other assignments in the book if we needed to do them. I was unclear in the beginning but was quickly explained that "no" not graded.
Nothing everything is great and enough time to finish assignments.

I did not particularly care for Peachtree (the system) but the course was fine. I was a little resistant to learn a new accounting system ( I use Quick books and Quicken) but I can see how a larger company can benefit from Peachtree! I am sure if I have to use it in the future I may grow accustomed to it! I plan to hold on to my text book for future references.
The only problem that I had was with the Software Company, when technical support was needed. There were no weekend hours and the weekday hours should have been extended.
Keep up the good work
This was my first time taking on line courses, this one went well.
